Objective:

Passionate IT professional with hands-on experience in Cloud Computing, Cybersecurity, QA automation and Game Development. Aiming to utilize advanced skills in AI/ML and software development to drive innovative solutions in the tech industry.

Skills:

- **Programming/Markup Languages:** C, SQL, Java, Python, HTML/CSS, JSON
 - **Technological Concepts:** AI/ML, DSA, OOP, Cloud Computing, Cybersecurity, CCNA, Cloud Architecture, Quantum Networking, Software Project Management, Inflight Entertainment, Avionics, SDLC & STLC, Agile & Scrum, API Testing, CI/CD Pipelines, Version Control (Git), API Testing, QA Automation, API Workflows
 - **Tools:** AWS, Azure, Cisco Packet Tracer, Jira, DataDog, PRTG, IBM Quantum Composer, Flytedge, Docker, Kubernetes, AWS Workspaces, PuTTY, VS Code, Postman, Restfox, Git, Selenium, Kafka, Argo CD, Playwright
-

Professional Experience:

Product Engineering – QA & Automation

M2P | 10/2025 – Present

- Worked as part of the QA team on a **production-grade fintech platform**, handling end-to-end testing including test case design, sanity/regression execution, API validation (Postman), and release verification using tools like Jira, Argo CD, MongoDB, and DevTools.
- Collaborated closely with product and development teams to identify, track, and resolve critical bugs while ensuring system stability across releases and hotfix deployments.
- Additionally contributed to **automation-driven process improvements** by building Playwright-based E2E frameworks using TypeScript and POM, improving test reliability and reducing manual effort.

Inflight Entertainment Intern

Thales | 03/2024 – 03/2025

- Working for enhancing passenger experiences through technical contributions and cutting-edge entertainment systems in Avionics & Inflight Entertainment technology.

Cloud Computing & Game Development Intern

Tech Mahindra Makers Lab | NOIDA, UP | 06/2023 – 09/2023

- Developed game designs using tools like Unity, Unreal Engine, and Blender.
 - Worked on mainstream projects including Meta Human and Indus Project.
 - **Meta Human:** Deployed cloud servers for Pixel Streaming applications, optimizing infrastructure cost and achieving a 76% reduction in hosting costs using AWS, GCP, and Linux technologies.
 - **Indus Project:** Contributed to developing India's own large language model (LLM) by curating regional dialect datasets for the Awadhi language.
-

Education:

Bachelor of Technology in Information Technology and Computer Science

Amity University, Noida | 08/2020 – 07/2024

- CGPA: 8.81/10.00 (Gold Medallist)
Achieved the highest Cumulative Grade Point Average in Information Technology and Computer Science.

- First Division with Distinction
Recognized for outstanding academic performance.
- Shree Baljit Shastri Awardee
Recipient of the prestigious award for embodying human and traditional values.

Senior Secondary (Class 12), CBSE | New Delhi, Delhi | 07/2020

- Percentage: 70.80/100.00

Secondary School (Class 10), | J.N.V NAFRA |CBSE| Nafra, Arunachal Pradesh | 06/2017

- CGPA: 9.60/10.00
-

Certifications:

- Cisco: Introduction to Cybersecurity (11/2022)
 - Cisco: CyberOps Associate (07/2023)
 - Cisco CCNAV7: Switching, Routing, and Wireless Essentials (01/2023)
 - Cisco CCNA: Enterprise Networking, Security, and Automation (07/2023)
 - NPTEL (IIT Bombay): Understanding Design (Apr 2024) — Ranked in Top 2%
 - NPTEL & IIT Madras: Introduction to Machine Learning (05/2023)
 - NPTEL & IIT Madras: Principles of Economics by IIT Madras (09/2023)
 - Salesforce: Salesforce Developer Virtual Internship (06/2023)
-

Key Projects:

Quantum-Driven Signal Processing for Classical Communication Enhancement

- Designed, simulated, and analysed hybrid quantum-classical communication models integrating Quantum Key Distribution (QKD), Bell state-based quantum networking, and machine learning-driven packet switching using IBM Quantum Composer, Qiskit, and advanced routing algorithms to enhance security, efficiency, and scalability in data transmission. Published our paper on IEEE Xplore.
- **Skills:** IBM Quantum Composer, Qiskit, Quantum Key Distribution, Bell State Entanglement, Packet Switching Optimization, Routing Algorithms, Quantum Circuit Design & Simulation, Data Security & Cryptography Principles

Lit Parking - Smart Parking App & Mindset - Mental Health Support App

- **Lit Parking:** Android application facilitating easy and secure parking management.
 - **Mindset:** Developed Android app aiding mental health disorder management.
 - **Skills:** Android Studio, Firebase, Java, Kotlin, UI/UX Development
-

Achievements:

- Received the Most Promising Project Award at Tech-Genesis during InCITe 2024 and the Best Paper Award at ICRITO 2024 IEEE 11th International Conference for the project “Quantum-Driven Signal Processing for Classical Communication Enhancement.”
- Awarded 1st place in the IT department at Technovate 2024 for the project “Quantum-Driven Signal Processing for Classical Communication Enhancement.”
- Bronze Award: Won bronze certificate for finishing up in top 15% in the NetAcad Riders 2023 Contest Asia Pacific, Japan, and Greater China region. (04/2023)
